## CONTENTS

1. Executive summary
2. What you asked us to do
3. Where you are today
4. What we found
5. The plan
6. Money and capacity
7. Risks and legal checks
8. Decisions we need from you
9. How we will track progress

Appendix A: Assumptions and data to confirm first

Appendix B: Prospects and pipeline

Appendix C: Experiments

Appendix D: Decision record

Appendix E: Sources

Appendix F: How to read this document

This document is confidential and prepared only for the named recipient. It is decision support, not legal, tax, or financial advice. Have a qualified professional confirm any legal, tax, or financial point before you act on it.

# 1. Executive summary

Demo Digital Solutions Ltd is a new Abuja company with three people, no customers yet, and about ₦6,000,000 in cash (your own estimate). It builds websites, business web apps, and monthly maintenance plans. This document gives you a plan to win your first clients and become established in Abuja, the decisions we need from you, and a 90-day action plan you can start this week. It is a fictional example built to show how the process works.

**What we recommend**

- Sell the **Starter Website** (₦350,000) as your entry offer, and turn every client into a monthly **Care Plan** (₦50,000 a month).
- Take 50% upfront on every project, and hold off on large custom apps until you have more team capacity and cash.
- Find clients with low-cost tests (free digital audits and a Google Business Profile now, referral partners in month 2), and review progress on 2027-01-23.

**What you can expect**

| Measure | Target | By when | Basis |
|---|---|---|---|
| Websites signed (total) | 6 | 2027-01-23 | ESTIMATE |
| Active Care Plans | 4 | 2027-04-25 | ESTIMATE |
| Lowest month-end cash in the planning case | About ₦2.7 million (month 8) | Month 8 | ESTIMATE |
| Monthly cash break-even | Reached in month 9 | 2027-07-25 | ESTIMATE |

**What we need from you**

Your five decisions in Section 8, plus a bank statement, your hosting and domain quotes, and details of your two warm contacts (Appendix A).

> **Important:** Your biggest risk is cash, not demand. With no sales you have about 4.8 months of cash. If sales run at about half the planned pace, cash runs out in month 8. Your company figures are your own estimates and have not been checked against records, so we rate the reliability of this plan as **low** until you send the documents listed in Appendix A.

# 2. What you asked us to do

You asked how a new digital solutions company can win its first paying clients and become established in Abuja, while protecting its cash. The first phase runs for 90 days, from 2026-10-25 to 2027-01-23.

| Objective | Measure | Starting point | Target | Deadline |
|---|---|---|---|---|
| Win your first paying website clients | Signed Starter Website projects (total) | 0 | 6 | 2027-01-23 |
| Build recurring income | Active Care Plans | 0 | 4 | 2027-04-25 |
| Protect your cash | Lowest month-end cash balance | ₦6,000,000 | Never below ₦1,500,000 | Ongoing |
| Cover your costs from sales | Monthly cash in at least cash out | Not reached | Within 9 months | 2027-07-25 |

# 3. Where you are today

You founded the company about two months ago. The team is you (lead developer and the only seller), a designer, and a junior developer. You have no customers yet and two warm contacts from your network.

| Item | Current position | Reliability |
|---|---|---|
| Cash on hand | ₦6,000,000 | ASSUMPTION |
| Fixed costs | ₦1,100,000 a month (pay, co-working space, power, internet, tools) | ASSUMPTION |
| Growth budget | ₦150,000 a month for the first 3 months | ASSUMPTION |
| Starter Website | ₦350,000; about 60 working hours | ASSUMPTION |
| Business Web App | ₦1,800,000; about 400 working hours | ASSUMPTION |
| Care Plan | ₦50,000 a month; about 4 working hours a month | ASSUMPTION |
| Team hours available | 320 a month; we plan with 256 (80%) to leave room for errors | ESTIMATE |
| Data-protection registration | Not yet done | ASSUMPTION |

**Market facts we relied on**

- Nigeria had 39,654,385 micro, small, and medium businesses in 2020, and 96.9% were micro businesses (National Bureau of Statistics figure, quoted in the PwC Nigeria MSME Survey, July 2024). VERIFIED
- In that survey, 88% of businesses used smartphones, 23% used WhatsApp Business, 19% used cloud services, 14% used specialised software, and 7% had an online store. The sample was small (about 557 to 567 firms), so treat these as directional. VERIFIED
- Abuja has about 72 startups and 20 support organisations, the second-largest tech community in Nigeria after Lagos (TechCabal; the article is undated and its link suggests December 2023, so it may be out of date). VERIFIED
- Nigeria's inflation rate was 14.63% in September 2026, down from 15.39% in August (National Bureau of Statistics, reported on 2026-10-20). VERIFIED

# 4. What we found

1. **Care Plans are your best use of time.** Each working hour earns about ₦10,500 from a Care Plan, ₦5,083 from a Starter Website, and ₦4,000 from a Business Web App ( ESTIMATE , from your prices and hours). The large custom app looks attractive but earns the least per hour.
2. **Cash, not demand, is your biggest risk.** With no sales you have about 4.8 months of cash ( ESTIMATE : ₦6,000,000 divided by ₦1,250,000 a month for costs and growth spending). In our planning case you reach monthly break-even in month 9. If sales run at about half that pace, cash runs out in month 8.
3. **One custom app would use up the team.** A ₦1,800,000 app needs about 200 working hours a month for two months. Adding even one new website in the same months goes over the 256 hours we recommend planning for.
4. **Discounts cost more than they win while capacity is tight.** A 20% discount needs about 30% more sales to break even, and a 10% discount needs about 13% ( ESTIMATE ). You have little spare capacity to deliver extra work.
5. **The market is large and mostly not yet online.** Most small businesses use phones and WhatsApp, but few have an online store ( VERIFIED , small sample). That is the gap a simple website plus a Care Plan can fill.
6. **Data protection applies from day one.** You will hold other people's personal data. You need to confirm your registration with Nigeria's data protection regulator and have a lawyer review your contract before the first signature.

# 5. The plan

## 5.1 Priorities

| Priority | Initiative | Why | When |
|---|---|---|---|
| 1 | Starter Website plus Care Plan as your entry offer | Highest score for profit, speed, and fit; builds recurring income | Start now |
| 2 | Free 20-minute digital audits for 10 Abuja businesses | Low cost, quick feedback, and a reason for businesses to talk to you | Now, finished by 2026-11-24 |
| 3 | Google Business Profile and case-study page | Almost free; helps local searches and builds trust | By 2026-11-10 |
| 4 | Referral partners (registration agents, accountants, co-working managers) | Trusted introductions, paid only when a deal closes | From 2026-11-25, after the legal conditions in Section 7 |
| 5 | Business Web Apps | Highest value per project but the least profit per hour, and it needs most of your team | Decide at the checkpoint on 2027-01-23 |

## 5.2 Offer and pricing

- **Offer ladder.** Start with the Starter Website (₦350,000). Offer the Care Plan (₦50,000 a month: hosting, updates, backups, small changes) when you hand the website over. Offer a Business Web App later, once capacity and cash allow.
- **Payment terms.** 50% to start and 50% on delivery, for every project. This protects your cash (needs your approval).
- **Launch discount.** We recommend 10% (₦35,000 per client) for your first 3 clients only, in return for permission to publish a real case study (needs your approval; see Section 8).
- **Prices are not yet tested.** Your prices come from your own estimates. Record the first 5 quotes, whether each was accepted or declined, and the reason. Review prices on 2027-01-15.
- **Review costs and prices every quarter.** Inflation was 14.63% in September 2026, so hosting and tool costs can rise.

## 5.3 Winning customers

**Who to target (a starting guess to refresh after your first 3 clients).** Private schools, clinics and pharmacies, professional firms (legal, accounting, consulting), and shops or restaurants that already sell through WhatsApp. They usually have a budget of ₦300,000 to ₦2,000,000, and the owner or administrator decides.

**How to reach them.** Build a list of 30 real prospects by 2026-11-15, each with a link or note showing where you found it (Appendix B). Run three low-cost tests with clear success and stop thresholds (Appendix C):

- **Free digital audits:** offer 10 businesses a free 20-minute review of their online presence. Success is 3 qualified conversations and 1 signed project within 45 days. Stop if there are fewer than 1 conversation after 10 audits.
- **Google Business Profile and case studies:** success is 2 enquiries a month by day 60.
- **Referral partners (month 2):** success is 2 qualified referrals in 45 days.

**Outreach rules.** Write each message yourself or approve our draft before you send it. Name yourself, include a simple way to opt out, and make only claims you can prove.

## 5.4 Action plan

All actions are proposals until you approve them.

### Days 1 to 30 (2026-10-25 to 2026-11-24)

| # | Action | Who | By when | Cost | Result to look for |
|---|---|---|---|---|---|
| 1 | Decide the five items in Section 8 | Founder | 2026-10-30 | None | Decisions recorded |
| 2 | Send background on your 2 warm contacts | Founder | 2026-10-28 | None | Both scored for fit |

| # | Action | Who | By when | Cost | Result to look for |
|---|---|---|---|---|---|
| 3 | Send bank statement and hosting and domain quotes | Founder | 2026-10-30 | None | Cash and costs checked against records |
| 4 | Check your data-protection registration and have a lawyer review your contract | Founder | Before the first contract (aim for 2026-11-15) | Lawyer fee (not yet known) | Written confirmation and an approved contract |
| 5 | List 30 real prospects, each with a source and date | Founder and team | 2026-11-15 | None | 30 sourced entries |
| 6 | Run 10 free digital audits (at most 20 hours) | Founder | 2026-11-24 | About ₦20,000 | 3 qualified conversations |
| 7 | Set up a Google Business Profile and a work page | Team | 2026-11-10 | About ₦30,000 | Profile live |
| 8 | Quote the first clients: ₦350,000, paid 50% to start and 50% on delivery | Founder | As leads qualify | None | Written quotes sent |
| 9 | Log the real hours of every job | Team | Every job | None | Time log shared monthly |

## Days 31 to 60 (2026-11-25 to 2026-12-24)

| # | Action | Who | By when | Cost | Result to look for |
|---|---|---|---|---|---|
| 10 | Monthly review | Founder | 2026-11-25 | None | Results recorded for each decision |
| 11 | Start referral partners with a written agreement | Founder | From 2026-11-25 | Up to ₦100,000, only when a deal closes | 2 qualified referrals in 45 days |
| 12 | Deliver the first sites and offer a Care Plan at handover | Team | As delivered | Delivery hours | A Care Plan offer to every client |
| 13 | Publish the first case study, with written permission | Founder | After the first delivery | None | Case study live |
| 14 | Start at most 3 new websites a month and sell no custom apps | Founder | Ongoing | None | Hours at or under 256 a month |
| 15 | Use the first two time logs to correct your hours per job | Founder | 2026-12-15 | None | Updated capacity plan |

## Days 61 to 90 (2026-12-25 to 2027-01-23)

| # | Action | Who | By when | Cost | Result to look for |
|---|---|---|---|---|---|
| 16 | Monthly review | Founder | 2026-12-25 | None | Scorecard updated |

| # | Action | Who | By when | Cost | Result to look for |
|---|---|---|---|---|---|
| 17 | Publish a second case study | Founder | 2027-01-15 | None | Two case studies live |
| 18 | Reset prices if the first 5 quotes show a pattern in accept or decline reasons | Founder | 2027-01-15 | None | Price decision recorded |
| 19 | **Checkpoint:** if fewer than 4 websites are signed in total, start the cost-cut or bridge plan | Founder | 2027-01-23 | None | Decision recorded |
| 20 | Decide whether to open Business Web App sales | Founder | 2027-01-23 | None | Decision based on cash and capacity |

### 5.5 Your first 7 days

1. Read this document and note anything that looks wrong, especially Appendix A.
2. Decide the five items in Section 8. Decide the discount (item 2) before you send your first quote.
3. Send your bank statement and your hosting and domain quotes.
4. Send details of your 2 warm contacts.
5. Book a lawyer to review your contract.
6. Start a simple time log for every job.
7. Approve the first 3 free digital audits. We will draft the messages, and you approve and send them.

## 6. Money and capacity

We built a simple month-by-month model. Half of each project is paid when you sign and half a month later. Care Plans start two months after signing, and half of your clients take one in the planning case (30% in the weak case). The first 3 websites carry the 10% launch discount. Costs are your ₦1,100,000 fixed costs and ₦150,000 growth budget every month, plus hosting and similar costs per project. The model leaves out tax, late payments, and pay rises. It shows direction and is not a forecast to bank on.

| Case | Assumptions | Lowest cash | Break-even |
|---|---|---|---|
| Planning case | 1, then 2, then 3 websites signed a month; 50% of clients take a Care Plan | ₦2,741,000 in month 8 ( ESTIMATE ) | Month 9 (cash in ₦1,500,000, cash out ₦1,457,000) |
| Weak case | 0, 1, 1, then 2 websites a month; 30% take a Care Plan | About ₦8,800 at the end of month 7, then below zero ( ESTIMATE ) | Not reached in 9 months |

**Why you cannot rely on websites alone.** Three websites a month bring about ₦915,000 of margin, and your costs are about ₦1,250,000 a month. Care Plans build up month by month and close the gap, which is why they matter so much.

**Capacity.** Your team has 320 working hours a month, and we plan with 256. In the planning case you use about 182 hours in month 3, 198 in month 6, and 216 in month 9, so you stay under the limit. One Business Web App would take about 200 hours a month for two months, which is why we advise against selling one until you have extra capacity.

# 7. Risks and legal checks

| Risk | Why it matters | What we do about it |
|---|---|---|
| Short cash runway | About 4.8 months with no sales | Take 50% upfront; use the 2027-01-23 checkpoint; keep cash at or above ₦1,500,000 |
| Unverified hours and prices | Plans could be too optimistic | Log real hours; test prices on the first 5 quotes |
| You are both lead developer and only seller | Selling time competes with delivery time | Cap audits at 10; do not sell custom apps yet |
| Data protection | Fines and loss of trust if you mishandle personal data | Confirm your registration tier; use a lawyer-reviewed contract with a data clause |
| Rising costs | Inflation was 14.63% in September 2026 | Review hosting and tool costs and your prices every quarter |

### Conditions to follow

- **Outreach:** write to businesses only, record where each contact came from, name yourself, include a working opt-out, and keep a do-not-contact list.
- **Claims and testimonials:** make no "best" or results claims without proof. Use real client testimonials, with written permission.
- **Referral fees:** put the agreement in writing, and have each referrer tell the prospect about the fee.
- **Contracts:** have a lawyer review your contract before the first signature (ownership of the work, payment terms, liability, maintenance scope, and how you handle your clients' data).

### Needs a qualified professional

- Your contract template: a Nigerian lawyer.
- Your data-protection registration tier and deadline: the regulator (ndpc.gov.ng) or a lawyer. The guidance we reviewed did not make the tier for a company like yours clear.

# 8. Decisions we need from you

| # | Decision | Our recommendation | Alternative | Needed by |
|---|---|---|---|---|
| 1 | The Starter Website plus Care Plan offer, with 50% to start and 50% on delivery | Approve | Change the price points first | 2026-10-30 |
| 2 | Launch discount for your first 3 clients | 10% (₦35,000 each, ₦105,000 in total), with a published case study | 20% (₦70,000 each, ₦210,000 in total), or no discount | Before the first quote |
| 3 | The free audits and Google Business Profile now, and referral partners in month 2 | Approve as scheduled | Delay referral partners until you have 3 clients | 2026-10-30 |
| 4 | The checkpoint on 2027-01-23 and a rule that cash never drops below ₦1,500,000 | Approve | Choose a different cash floor | 2026-11-10 |
| 5 | A lawyer review of your contract and a check of your data-protection registration tier | Approve | None advised | Before the first signed contract |

**Why we recommend 10% and not 20%.** Our sales specialist argued for 20% to win the first clients faster. Our pricing specialist argued for 10%. A 20% discount costs ₦105,000 more in total and needs about 30% more sales to break even, while your team has little spare capacity. We have no evidence yet about which works better. What would settle it: the reasons your first 3 to 5 prospects give when they accept or decline. A middle path is to start at 10% and offer 20% only to a client who also gives a written testimonial and an introduction, with your approval.

# 9. How we will track progress

| Objective | Starting point | Target | Check date |
|---|---|---|---|
| Websites signed (total) | 0 | 6 | 2027-01-23 |
| Active Care Plans | 0 | 4 | 2027-04-25 |
| Lowest month-end cash | ₦6,000,000 | Never below ₦1,500,000 | Every month |
| Monthly cash break-even | Not reached | Within 9 months | 2027-07-25 |

**Planning-case path ( ESTIMATE )**

| Measure | By day 30 | By day 60 | By day 90 | How to measure |
|---|---|---|---|---|
| Websites signed (total) | 1 | 3 | 6 | Signed quotes |

| Measure | By day 30 | By day 60 | By day 90 | How to measure |
|---|---|---|---|---|
| Cash at month end | About ₦4.86 million | About ₦4.0 million | About ₦3.47 million | Bank balance |
| Working hours used in the month | About 60 | About 120 | About 182 | Time log (limit 256) |

**Review dates:** 2026-11-25, 2026-12-25, and the checkpoint on 2027-01-23.

**Rules that trigger a change of plan**

| If this happens | Do this |
|---|---|
| Fewer than 4 websites signed in total by 2027-01-23 | Start the cost-cut or bridge plan |
| Month-end cash falls below ₦1,500,000 | Stop all discretionary spending and review the plan |
| Planned hours in any month exceed 256 | Pause new project starts |
| 3 of the first 5 declined quotes cite price | Review pricing before offering more discounts |

**Send us each month:** your bank balance, a list of quotes sent with accepted or declined and the reason, your time log, and which invoices are paid.

# Appendix A: Assumptions and data to confirm first

| Item | What we assumed | How to confirm it | Why it matters |
|---|---|---|---|
| Cash on hand | ₦6,000,000 | Send a bank statement | Sets your runway |
| Fixed costs | ₦1,100,000 a month | Send the last 3 months of statements | Sets your break-even |
| Prices | ₦350,000, ₦1,800,000, and ₦50,000 a month | Test on the first 5 quotes | Drives all income figures |
| Working hours per job | 60, 400, and 4 a month | Time logs from the first jobs | Sets how many projects you can take |
| Care Plan take-up | 50% of clients (30% in the weak case) | Count real Care Plan sign-ups | Drives your recurring income |
| Payment timing | Half at signing and half a month later | Check actual payment dates | Drives your cash low point |
| Data-protection registration | Not yet done; tier unclear | Check with the regulator or a lawyer | Legal exposure |
| Contract | Standard template, not yet reviewed | Lawyer review | Protects you and your clients |

# Appendix B: Prospects and pipeline

**Who to target (a starting guess).** Private schools with 50 to 500 pupils, clinics and pharmacies, professional firms, and WhatsApp-led shops and restaurants in Abuja. They are triggered by a new business, a rebrand, lost leads, or a need for online booking, fees, or orders. Budget range: ₦300,000 to ₦2,000,000. We rule out anyone who needs a mobile app, a team larger than three, delivery in under two weeks, or guaranteed sales results.

**Where the pipeline stands.** It has 2 warm contacts from your network, not yet scored. We have not added any other names, because every entry must come from a real source with a date.

**How to build it to 30 prospects by 2026-11-15**

1. Search Google Maps and Google Business Profiles for Abuja schools, clinics, and firms, and note the link and date for each.
2. Search the Corporate Affairs Commission's public company search for newly registered Abuja companies, and note the reference.
3. Ask for introductions from your own network.
4. Record only business contact details, and note where each came from and whether the person has opted out.

# Appendix C: Experiments

| Test | Hypothesis | Cost | Success threshold | Stop threshold |
|---|---|---|---|---|
| Free digital audits | If we offer a specific audit, at least 3 of 10 businesses will agree to a follow-up | About ₦20,000 plus 20 hours of your time | 3 qualified conversations and 1 signed project in 45 days | Fewer than 1 conversation after 10 audits |
| Google Business Profile and case studies | If you are findable locally and show real work, enquiries start | About ₦30,000 | 2 enquiries a month by day 60 | 0 enquiries by day 90 |
| Referral partners | If trusted advisers refer clients for a fee, qualified leads arrive | 10% of the project price, paid only when a deal closes (₦35,000 on a ₦350,000 site) | 2 qualified referrals in 45 days | 0 referrals after 5 partners approached |

With fewer than about 30 results per test, treat the outcome as a direction and not as proof.

# Appendix D: Decision record

| ID | Recommendation | Status | Review date |
|---|---|---|---|
| D-001 | Launch the Starter Website as the entry offer, with a Care Plan at handover | Proposed | 2026-11-25 |
| D-002 | 10% launch discount for the first 3 clients, tied to a case study | Proposed | 2026-11-25 |
| D-003 | No Business Web App sales until extra capacity exists; at most 3 website starts a month | Proposed | 2026-11-25 |
| D-004 | Run the free audits and set up the Google Business Profile | Proposed | 2026-12-12 |
| D-005 | Start referral partners in month 2, with a written agreement | Deferred to month 2 | 2027-01-10 |
| D-006 | Take 50% upfront and 50% on delivery on every project | Proposed | 2026-11-25 |
| D-007 | Checkpoint on 2027-01-23: fewer than 4 websites signed starts the cost-cut or bridge plan | Proposed | 2027-01-23 |
| D-008 | Confirm your data-protection registration tier and have a lawyer review your contract | Proposed | Before the first contract |

# Appendix F: How to read this document

- VERIFIED means the figure comes from your own records or from a source we name.
- ESTIMATE means we calculated it from verified figures, using the method shown.
- ASSUMPTION means a working guess that has not been confirmed. Appendix A says how to confirm each one.
- We recommend; you decide. Nothing in this document commits you to a price, a contract, a purchase, or a message to a customer until you approve it.
- This document is decision support and not legal, tax, or financial advice.
